

Dear Mr. President,

Sweden Nov. 9, 2020

I am a fellow living in Sweden. I admire you for your commitment to righteousness and freedom, and for being forthright, bold and intrepid in this crucial hour of Americas destiny.

A summary of this letter:

You were on right track Mr. Trump in your remarks about a 4 hour counting silence followed by a sudden change in favor of Mr. Biden. This letter strongly indicates if not proves that a 24/7 ongoing hijacking of the votation counting systems in USA is going on by the international military industrial complex, and that this scheme has become international. The officials in counties and states responsible for inputing count totals to vote.gov are handpicked since years back for this purpose or otherwise threatened to silence about eventual discoveries of data being inexplicable changed, and they have thus become part of the deep state as it also is called.

This is also the true reason behind the odd statement from a woman that you commented that went something like "Mr. Donald Trump will by no circumstances be declared president of the United States before the end of the election day".

By pointing out only minor violations of counting rules, Mr. Rudy Giulianis chances for re countings are low, and what difference should it make, if some wicked ones either logged in to the counting system or by other means of hacking are able to from remote computers monitor the whole counting process and altering the data as they please?

If you will believe me after reading this letter, and can have Mr. Giuliani to believe me too, he is perhaps the right man for this changed approach thanks to his experience of cyber protection which I read somewhere about.

He must add specific requests with motives in the state courts in order to stop the hijackings and have them granted before the recounts get started, but time is short and I do not know when you will read this letter and eventually he too.

The election site vote.gov is easy to hack and has been so from North Korea, a British security firm have reported to your administration according to the article in Enclosure A.

The same kind of fraud happened in Sweden

By stealing 22 computers and 27 mobilephones from one of the totally 21 Swedish governmental district boards (Länsstyrelser) responsible for managing the Swedish general elections, two nights before the general Election day on a Sunday in 2018, the orderers of the bulgarly got unlimited **editing** access to their election web pages as well as the national election website val.se,

which corresponds to vote.gov in USA.

Long link: <https://www.sydostran.se/karlskrona/misstanks-for-jattestold-hos-lansstyrelsen-nu-inleds-rattegangen>

Through studying agendas and events surrounding the election, I have identified the orderers as the secret international military industrial complex. The following assumed series of events is the most logical: During the next 2 days, a staff to the orderer of the bulgarly could undisturbed alter the votation totals from all or many of Swedens 6004 election districts in the val.se website in order to look real, matching a poll from the international Ipsos, part of a giant concern in their power sphere, published 4 days prior to the election day. That poll showed so much lower support to the nationalistic Sverigedemokraterna than all other polls at the time that a renowned professor in political science could not believe it.

It would however look too strange to drastically change the political landscape from one moment to another, so this gang simply shut down the votation website val.se at ca 8 pm, replaced the figures with their own and swithed the site back on again as late as ca 12 pm.

How clever! The result were never powerfully challenged thanks to

- the consistensy with their likewise faked poll some days earlier which gaved the plot credibility
- their stalinistic control over the media and
- an efficient internet censorhip through the tech giants

These wicked guys triumphed and became of course eager to repeat the same fraud in the coming US election for president, which they did.

This in depth text box is not essential to read for your case

However, Sverigedomokraterna had become too popular (ca 25% in other polls right before election) for keeping them away from reaching government by lowering their votes only (they dared to reduce them with 8% down to 17%) because there were other non socialistic parties in the parliament as well. So their plot included an additional ingredient...

Because perhaps mostly thanks to George Soros, they had managed to make Sweden a cherished model nation in their agenda to destroy the nation states of Europe, to establish a totalitarian United States of Europe under a tyrannic One World Government. In Sweden: Checks gone, cashs away out, heavily media control, highest immigration level per capita in Europe, heavily increased murder, rapes and suicide as a consequence. A government lead by Sverigedomokraterna would change much of that in an instance.

What they did was to invite one of the other non socialistic party leaders, Annie Lööf, to the Bilderberger meeting in the USA the year before. What they told her we do not know, but what she did. She became the most submittive support party of three of the Swedish left & green government formed as a result of to the fraud, despite of being a non socialistic party.

Signs of continuing hijacking

An ongoing hijacking of local election systems including the national vote.gov is the only logical explanation to why Joe Biden the recent days got slightly more and more votes until he "won" despite of the fact that there is more likely to be an overweight for Trump votes because these late countings are mainly

- on election day casts, wich began with a surge for Trump just before the sudden 4 hour report brake.
- military and other foreign votes; typically Trump supporters.

My recommendations

On behalf of all the freedom lovers of the entire world, I plea to you for democracys sake to request not only re countings but also that they shall be preceded by efficient means to hinder alterations of vote counts in the election system or systems of the particular state plus vote.gov.

You can motivate this with

- FBI:s conclusion of investigation that the vote.gov election system is very vulnerable for unauthorized hijacking and has allready been hacked from North Korea (see last page).
- A present ongoing hijacking of an unknown number of election systems is suspected to be ongoing because of
 - A: the sudden increase of votes for Biden in most or all of the states counted right after a 4 hour report brake compared to the reports before the brake.
 - B: the remarkably great resemblance with an election system shut down during Swedens last general elections on September 9 2018.

Example of requests:

- Replacement of all counting personall engaged in the first counting or at least those who inputs counting totals to any internet based counting or counting report system.
 - Replacement of all its servers and log in credentials
 - Detaching mechanisms of electronic voting machines that can alter the voting results, to be inspected and affirmed by a technician representing the complainant.
- The last point above is based on following bombshell CIA

whistleblower story which I just got before sending this letter to you. A "must watch"-report with demasking Joe Biden clips":
<https://www.distributednews.com/470929.html>

I also recommend you to check with your lawyers around the states about the security of finished counted ballots. These are now becoming material of evidence that must be protected from unauthorized access, around the clock by armed guards as well as by surveillance cameras. You can perhaps offer your own federal police for this task. Because nothing seems to stop the deep state when their secrets are threatened.

A demasking of this kind of fraud would be a boost for democracy of enormous proportions for the entire world.

The bad news

The bad news is that even if Mr. Giuliani would be allowed re counts but with all technical rigs kept, you can not win the election.

The good news

The good news is that the more digital & technical rigings, the greater will the discrepancy to the actual, ballots be, and the disclosure of fraud, with shock waves throughout the world.

So as long as the votes are at hand and voting machines and election computer servers are at hand for examination of third party technicians in search for manipulations, all such manipulations will be discovered and this whole gigantic international plot will collapse and the jails will be filled up, and the eye opener of the peoples will finally be at hand.

It is just a matter of time. I see your role as to do what you can to shorten it. Please!

Your heroic deed of exposure this giant fraud will be written in the history books. All the masses that now laugh at you would laugh no more and your imprints in the Book of Life in the Heavens would be eternal.

I love you!
